

How to Open Your Fussels Rapeseed Oil 5 Litre Can

- 1) Break the seal on the circular plastic edges as shown.

- 2) Lift the plastic edges and pull upwards to 'pop' out the dispenser. You may want to place your hand on the top of the can to steady it.

- 3) Twist the white cap anti-clockwise and unscrew it.

- 4) Once the white cap is removed, set it aside and lift the clear loop to break the seal on the dispenser. Your oil is now open and ready to pour.

- 5) To close, screw the white cap back on and push down.

- 6) Top tip: When pouring tilt the can sideways.
